Press Release

Digital Detective appoints Head of Digital Forensics

Digital Detective Group, a provider of leading digital forensic software, is pleased to announce that Paul Andrews has been appointed as Head of Digital Forensics.

Paul has been involved in the field of digital forensics for the past 10 years and has considerable experience within a Law Enforcement environment. He spent over 8 years working in the Digital Forensics Unit of Kent Police and during that time was involved in hundreds of investigations involving the extraction and analysis of digital evidence across crimes such as terrorism, murder, rape, domestic extremism, robbery, drugs distribution, fraud, counterfeiting and paedophilia. He has considerable court experience and has produced, and delivered, quality evidential packages at Crown, Magistrates and Family court level.

Paul most recently worked for QCC Information Security based in London where he continued his involvement with criminal cases but also added commercial work and a dash of e-discovery to his repertoire.

Paul holds a Master of Science degree in Forensic Computing and Cybercrime Investigation from University College Dublin with his thesis dealing with the challenges posed to Law Enforcement by digital CCTV systems.

Paul is an experienced user of Digital Detective software and has utilised them in his forensic examinations since inception. He has been involved in the evolution of Blade™ from a specialist e-mail recovery tool to its current iteration as an advanced professional forensic data recovery solution.

Paul has considerable experience in the field of research and development and will be using this to assist in expanding the capabilities of our forensic software; he will be driving the development of our new training courses as well as managing the day to day activities of our Digital Forensics Lab.

About Digital Detective Group

Digital Detective is the worldwide leading provider of the web-browser forensic analysis software NetAnalysis and is dedicated to developing digital forensic software products designed to deliver superior speed, stability and cutting edge features for the preservation, extraction, analysis and presentation of digital evidence. Their software is in use worldwide by both law enforcement agencies and corporate entities.

Digital Detective has been supporting law enforcement in the forensic examination of digital devices since 2001.
